Pierre Elliott Trudeau High School - High School Diploma

Markham, ON | Sept 2022 – June 2026

- **Incoming:** University of Waterloo Systems Design Engineering student (Sept 2026 – May 2031)
- **Awards:** Schulich Leader Nominee (1/455 students), UWaterloo Contest Distinctions (CCC, Cayley, CIMC, Fermat), DECA Provincials Top 20 Overall, Science Certificate of Excellence (Physics, Chemistry, Biology), Basketball YRAA Finalist

SKILLS

Technical Skills: Python, Java, Git, GitHub, C++, HTML/CSS, JavaScript, GameMaker, OpenCV, Shopify, MS Office

Soft Skills: Communication, Adaptability, Teamwork, Pitching

EXPERIENCE

Founder and Web Developer - Catch 'Em Crate

Markham, ON | June – Sept 2025

- Built a trading card subscription box business, generated **\$1000 in revenue**, earning the **Markham Youth Startups award**
- Developed e-commerce website, acquiring **200+ visitors** using HTML, CSS, JavaScript and Shopify integrations
- Managed an Instagram social media presence, drawing **6000+ viewers** and creating posts in Canva and Clipchamp

Tutor - Trudeau Tutoring & Co.

Markham, ON | Sept 2024 – Feb 2025

- Tutored **10+ high school students** math and science concepts, helping them build skills and confidence in challenging topics
- Designed individualized learning plans that adapt teaching techniques according to the tutee's feedback and learning style

PROJECTS

FoodFindr (foodfindr.tech) | Node.js, Express, SQLite, Google Maps/Places API, Claude API

- Deployed a full-stack restaurant recommendation app that provides AI recommendations based on real Google reviews
- Hardened AI recommendations with a code-level dietary safety check after prompt-based filtering let unsafe picks through

SingScore | React, TypeScript, FastAPI, PyTorch

- Built an ML pipeline turning any song link into a playable karaoke game via chained vocal separation and transcription models
- Designed a React/TypeScript frontend scoring live microphone pitch in real time via the Web Audio API

Gesture Control App | Python

- Built a computer vision app using Python, OpenCV and MediaPipe to map hand gestures to mouse and OS controls
- Implemented a smoothing algorithm to reduce motion jitter, enabling accurate real-time gesture tracking across the screen

Just Die (Daydream Hackathon 1st Place, 115+ competitors) | GameMaker Language

- Collaborated on a team of **3 developers** to design and build a puzzle-platformer game using GameMaker
- Led level design, art direction and the final pitch to judges, contributing to a first-place finish among **115+ competitors**

Simulation Projects | Java

- Built OOP simulation modeling vehicles and animal agents, implementing collision detection for multi-entity interactions
- Developed a grid-based supermarket simulation, managing customer movement using node-based pathfinding

Computer Engineering Projects | C++, Python

- Developed a math game using C++ that generates quizzes via an Arduino, designing schematic diagram in Fritzing
- Built a navigation helmet for the visually impaired with Python, a Micro:bit and radio signal, working with a **team of 4**

INVOLVEMENTS

President - Trudeau Athletic Council

Markham, ON | Sept 2024 – Present

- Led a team of 24 members to create events for **~1800 attendees**, including a **fundraiser earning \$5,700** for charity
- Designed and executed new initiatives including an internal mentorship program and efforts to increase inclusivity within events

Treasurer and Grade Representative - Trudeau Student Activity Council

Markham, ON | Sept 2022 – Present

- Managed council's **\$8000+ budget**, tracked expenses, and optimized the allocation of funds for activities and events
- Organized 25+ events engaging **~1800 attendees** while advocating for 400+ students, collecting feedback to implement changes
